Awesome Upgrade

I upgraded from an S7 edge and not boy am I glad I waited for the note 9. Yes it is a big phone but I can handle it just fine. It has a beautiful bright display. Battery life is very good. Like really. It is. The Dolby dual speakers make such a difference in sound quality. The AKG earbuds that come with the phone sound phenomenal. The best I've personally ever heard from any other buds. The only negative I would say about the phone is that it's thick and pretty hefty. Other than that it's perfect. I've had it since the 24th and I can't put it down.

☑ Yes, I recommend this product.

Better than the iPhone

Love this phone from size to the pen from storage to photo quality, this phone takes pictures so nice on dim and night time

something that mu old pop e was lacking, keeps me organized even more and with the s pen I can right notes and on pictures get Autographs, plus I tested it with my friend who has the new iPhone and mine took better pictures, if your a picture lover and like vlogging and or love being organized this phone is for you , highly recommend if your deciding between iPhone and this one and storage enough said and no need for ear buds comes with it and fast charging oh and battery for me long lasting, best phone out there so far very pleased

✔ Yes, I recommend this product.

Beast of a phone! Never going back to iPhone

512gb storage 8gb ram spen best screen on the market fast wireless charging fast charging iris scanner fingerprint scanner etc etc etc. This phone has every feature you could want in a smart phone with an all day battery while being waterproof. Call it what you want but you would be crazy to buy any other phone that doesn't do everything this phone does. The features list is so long and you will find most features are features that actually are useful not gimmicky. I'm done talking about it. Go buy some other trash and be left wanting more I'll enjoy the best phone of 2018 with my vr and best rated screen on a smartphone.

✔ Yes, I recommend this product.

Love It!!!

My first Note was the Note 4. That was a great device for it's time. I still see a few people using them here and there. Had the iPhone 7 before upgrading to this beast. First impressions had me in an OMG moment. This device is huge. It's like carrying a tablet in my hands. Screen is huge, bright, crystal clear, and vibrant. I miss having an android device and a Note device at that. The customization is virtually endless. Functionality is great for me as I have big sausage fingers. Battery life is awesome and this thing charges lightning fast. 0 to about 50% in slightly less than 30 minutes. I'm a moderate to heavy user. Take it off the charger around 9am and still have about 35 - 40% by 10 PM. Don't see myself getting tired of this device for a good while.

✔ Yes, I recommend this product.

AT&T has nothing to do with this promotion, it is being offered solely by Samsung and Epic Games. The promotion, though vague in terms of redemption, states that anyone that pre-orders the phone can validate and redeem through the Shop Samsung app once they receive the phone.

Will the Note9 be IPv6 compatible and will ATT support it on this phone? Will this make the hotspot more compatible with multiplayer gaming offering an open NAT?

Hi @MassCOFG,

Yes, it is compatible with IPv6 sites. This device does not have router functions to set up UPnP and not recommended for gaming. The Nighthawk Mobile Hotspot does support UPnP.
